FALL 1963

Items of interest

* For easy reference and as a guidance to our customers, we marked the Tulips and Hyacinths varieties most suitable for forcing with an asterisk.

() The number within parentheses, mentioned in the descriptions of fall bulbs, represents the approximate heights at the time of flowering at our nurseries at Heiloo, Holland.

Customers are invited to examine the bulbs upon arrival and to check the contents of their consignment. Paper bags should be opened immediately so as to allow fresh air to reach the bulbs and kept in a cool, dry place till planting. Complete planting instructions will be enclosed with each shipment.

DE JAGER'S GOLD MEDAL TULIPS

There is no question that the various races of the Tulip rank in popularity as the most attractive of the Spring-flowering bulbs. They are easy to cultivate with an almost unlimited choice of colours which give a pleasant charm to the garden from March to the end of May. As in Narcissi, so in Tulips there are several distinct varieties. The Tulipa Species include varieties that are the earliest to bloom and so bring a gay colour in the garden almost before the winter has departed. Early in April the Single Early Tulips begin to bloom heralding the advent of another Summer. A week or so later the Double Early Tulips spread their charm with their gay coloured peony-like flowers. The Mendel and Triumph next appear with their long sturdy stems and wonderful shades to bridge the gap until May when the magnificent Darwin, Cottage, Lily-flowering, Parrot, Breeder and Double Late Tulips provide the fascinating shades with which nature has so richly endowed these types.

Collections of Tulips. Our Collections are intended to meet the requirements of Customers who may not have the time to make a studied selection of named varieties or perhaps may not be too familiar with the many varieties but desire a comprehensive range of shades. We select varieties from our named stocks that are good garden varieties and easy to grow, and as each package has the name and colour attached, the Collections can be arranged and planted as desired. All bulbs are top size and carry our assurance of your satisfaction.

Outdoor culture. Planting can be done from late September until the end of November in any ordinary well drained soil, a dressing of well-rotted manure, compost or bone meal is a valuable addition to the soil if manure is used it should be worked in well and not allowed to come in direct contact with the bulbs. Plant 4 inches deep and 4 to 6 inches apart. A trowel should be used in preference to a dibber as this usually gives a pointed hole in which case the bulbs rest in an air pocket which generally leads to trouble, the base of the bulbs should rest firmly on the soil. It is not advisable to plant Tulips in the same bed in succession unless the soil has been renewed, if this is necessary the soil should be refreshed to a depth of at least one foot but if this is not possible the use of Botrilex as a soil dressing is recommended. It is advisable when making a planting of bulbs in sectional colours to study the height of each variety as given by the figures in inches after each name as the selection of one variety growing 5 or 6 inches higher than the others spoils the symmetrical effect and always draws attention to this point rather than to the beauty of the blooms.

For Forcing: Early Tulips (single and double) including Mendel Tulips are suitable for the earliest forcing, while Darwin and Triumph Tulips are for late forcing. After planting and plunging the Tulips it will take at least 10–12 weeks, before the shoots and sprouts are high enough for them to be brought into a dark room at a temperature of 55–60 F, thus allowing the stems to lengthen. After 10 days to two weeks the Tulips can be removed into a light warm room. For a few days, the bulbs should be covered with some paper before exposing to the full light. Tulips should never be hurried and bottom heat and draught should be avoided. Generally speaking, Amateurs should never bring in the bulbs, until the shoots are 3 to 4 in. high and after the middle of January.

Origin: The first time Tulips were ever mentioned was in 1554, when Busbequis found a few specimen near Constantinople. Six years later, Carolus Clusius brought some of these Tulips to Holland and in 1601 he described 19 varieties in full detail and added 5 pictures. Dodonaeus wrote about Tulips in his Kruidtboek 1618 and made three different sections. Most of the Tulips had broken colours and this was considered very fashionable. In 1634–1637, during the Tulipmania, fantastic prices were paid for bulbs, e.g. 1 Semper Augustus \$ 2200.—, weight 2000 aces. The bulbs were sold per 'ace', one ounce is 5900 aces and a good Tulip bulb weighs now 7000 aces.

Darwin Tulips

(May-flowering)

We confidently recommend this late-flowering section of self coloured Tulips with their stately bearing and rich colours. They deserve universal attention and are most valuable in the garden, borders etc. because of their brilliant colours and their long upright stems. The Darwins flower after the Triumph Tulips and are excellent for cutting, just at the time when most spring flowers are over and there is scarcity of flowers. As cut-flowers they are decorative in vases and last a long time in water.

Origin: A collection of Tulips imported from the North of France by Messrs. Krelage & Son of Haarlem. The actual origin is not known, but they were offered and brought into circulation in 1889, when they created a sensation, because of their long stems and fine colouring.

For Forcing: Varieties marked with an asterisk (*) are suitable for late forcing but they should never be forced in too high a temperature and should be watered moderately. Darwin Tulips cannot be had in flower much before February, with the exception of the varieties Wm. Copland and Rose Copland which may be brought into the greenhouse for gentle forcing about the end of December.

Bulbs and tubers are of first quality and customers may rely upon getting good value in every respect. All the different varieties are properly and separately labelled.

Cottage Tulips

(May-flowering)

Cottage Tulips are so named because they were originally found in old Cottage Gardens of Great Britain and France, where they had been growing for a great number of years. They are distinct in habit, embrace many beautiful colours and are excellent for borders, where they should be freely planted in large clumps or masses. They may also be naturalized in grass, Wild Gardens, etc. and present a gorgeous display during the month of May.

COLLECTIONS OF COTTAGE TULIPS

As in all collections of Bulbs offered in this catalogue, our collections of Cottage Tulips are made up very carefully, comprise a full range of colours and varieties of good merit only. Top-Size bulbs.

Triumph Tulips

(Mid-Season)

A race of Tulips of most outstanding characteristics and merits. They are exceedingly valuable for the flower garden, in borders etc. on account of their strong tall stems and vigorous habit. Most pleasing shades of self-colours, bi-colours, edged, flushed, striped and margined, not be found in other types of Tulips, stress the beauty of this section. Triumph Tulips flower immediately after the Mendel Tulips and are a valuable addition to continue the succession of Tulips. The substance and the size of the flowers are superb and some varieties will force steadily.

COLLECTIONS OF TRIUMPH TULIPS

Parrot Tulips

(May-flowering)

These artistically shaped flowers with their heavily lacinated petals have no rivals for exquisite effect. The gorgeous flowers are large and strikingly beautiful, very effective and picturesque in the garden for their rich brilliancy, fine for table decoration and in vases. A bunch of mixed Parrot Tulips creates a fascinating and artistic effect and lasts well in water. All the Parrot Tulips are sports of Tulips from various sections and with the exception of their lacinated segments have more or less the same qualities as the varieties from which they originate.

COLLECTIONS OF NEW PARROT TULIPS

The varieties in these collections are outstanding for beauty and fascination, in full colour harmony and suitable for garden and cutting purposes.

Early Double Tulips

Double flowering Tulips are of fairly robust growth and have massive flowers, in many cases they are as large as small Peonies and last much longer than Single Tulips. The Double Tulips are not so elegantly formed as Single Tulips, nevertheless they are exceedingly useful and effective for bedding purposes. Most of the Double varieties are excellent forcers and make fine displays when grown in pots pans, boxes, etc., they should be forced slowly. They are excellent window box subjects.

COLLECTIONS OF EARLY DOUBLE TULIPS

We include in our collections of Early Double Tulips five beautiful different coloured varieties of the same habit and height, which we can recommend with every confidence.

Broken Tulips

(Feathered and flaked flowers)

The history of Tulips starts with 'broken coloured' Tulips and goes back as far as 1554. These magnificent specimens which in those days were most fashionable and for which in 1635 fabulous prices were paid, can still be admired on old paintings. Broken Tulips have since been classified as Bizarres, Bijbloemen and Rembrandt Tulips according to parentage and colour. These historical Tulips have been kept in culture and they are now offered on this page. Broken Tulips are most artistic and useful for cutting and bedding.

REMBRANDT- BIZARRE- AND BIJBLOEMEN TULIPS

They comprise a strain of Darwin- Breeder- and Cottage Tulips which are broken into permanent variegation of lavender, white, red, orange, brown and many other fantastic coloured stripes, flakes and featherings. They are extremely useful for cutting and bedding and flower together with all May-flowering Tulips.

BELLE QUEEN (BIZARRE) (22), a fine combination of bronzy-yellow intermingled with mahogany and clear yellow, a most attractive variety for cutting. \$ 1.55 per doz.; \$ 11.25 per 100

BLACK BOY (BIZARRE) (20), a particular distinct and beautiful variety with a clear golden feathering on a dark mahogany-black ground, a most attractive colour combination; the lovely rounded flowers are of medium-size. \$ 1.90 per doz.; \$ 14.00 per 100

BOUQUET ROYAL (BIZARRE) (20), a very charming flower of nice form, flamed and feathered rich bronze and mahogany on yellow ground, exceedingly effective in front of the border and for home decoration. \$ 1.50 per doz.; \$ 11.00 per 100

CORDELL HULL (REMBRANDT) (26), is blood-red on white flowering in May, an exquisite variety for the garden and can be forced after January 10th. \$ 1.50 per doz.; \$ 11.00 per 100

GOLDEN HAWK (BIZARRE) (20), flushed and feathered with brownish bronze and mahogany on a yellow underground, a grand tulip of artistic shading. \$ 1.50 per doz.; \$ 11.00 per 100

INSULINDE (BIZARRE) (21), one of the most beautiful Bizarre Tulips with a rare combination of yellow and bronze intermingled with mahogany and violet, the well-formed flowers are gracefully carried on a thin but strong stem. \$ 1.60 per doz.; \$ 11.75 per 100

MADAME DE POMPADOUR (REMBRANDT) (20), white, flamed with soft lilac-purple giving it the appearance of a fine Rembrandt Tulip, a variety of unusual interest and an outstanding member of this section. \$ 1.60 per doz.; \$ 11.75 per 100

MAY BLOSSOM (BIJBLOEM) (16), a most artistic Tulip of lovely rounded form veined bluish purple on creamy-white ground, extremely fine cut-flower and a gem for the garden. \$ 1.60 per doz.; \$ 11.75 per 100

MONTGOMERY (REMBRANDT) (26), a fine strong variety of excellent form and pleasing colour combination of pure white beautifully edged rosy-red, very attractive. \$ 1.60 per doz.; \$ 11.75 per 100

Mixture of Rembrandt- Bizarre- and Bijbloemen Tulips

We offer a mixture composed of these Tulips which is unsurpassed for its sensational and artistic effect. It embraces the shades of striped and flaked scarlet on white ground; orange, brown and black featherings on a yellow ground with the violet and rose featherings on white ground. If cut these Tulips create a historical yet modern effect. \$ 1.50 per doz.; \$ 11.00 per 100

Broken Tulips

Greigii Tulips (with marked and mottled foliage)

We offer these magnificent Greigii and Greigii Hybrid Tulips in a special Sub-Division as we do Kaufmanniana, Fosteriana and others.

They are certainly very outstanding. When more available and plentiful, they are bound to become a very important group of Tulips for garden decoration, not only because of their splendid colours but also on account of their beautifully marked and mottled leaves and long lasting qualities. They are indeed a recognized triumph for the raisers of these outstanding Tulips.

JESSICA (12), brilliant scarlet-red throughout, a wonderful species of enormous size, outstanding for its beautiful form and very decorative broad foliage, which is slightly mottled. **40 cts** each; **\$ 4.00** per doz.

MARGARET HERBST (12), a handsome vermilion-red flower of great size, vigorous habit and of true Greigii form, leaves are beautifully marked and mottled, outstanding. **50 cts** each; **\$ 5.00** per doz.

GREIGII HYBRIDS IN VARIOUS SHADES OF RED AND ORANGE producing large flowers, in a magnificent variation of beautiful shades from orange-red vermilion to dazzling scarlets, creating a wonderful effect in the garden, leaves are marked and mottled purple. **50 cts** each; **\$ 5.00** per doz.

GREIGII HYBRIDS, A SPECIAL MIXTURE OF BEAUTIFUL YELLOW SHADES, most of them marked with an attractive small band of glowing orange on outer petals. **50 cts** each; **\$ 5.00** per doz.

Viridiflora Tulips (Green Tulips)

Many visitors to our Flowershow Exhibits were delighted with the delicate elegances of these Tulips and therefore the 'green' viridiflora Tulips have been separately listed. They are green shaded and considered to be the most delicate of all Tulips, ever created. The green structure of the flower petals enable these varieties to stand all weather conditions extremely well.

ANGEL (14), a fine artistic tulip of pure ivory-white shaded with applegreen on each petal, a variety of outstanding appearance for its unusual colouring and especially useful for fine floral arrangement. **\$ 2.50** each

ARTIST (10), A.M. Haarlem, a rare member of the Tulip genus with flowers of very unusual colour combination of terra-cotta and green passing entirely green as flower ages, extremely long lasting, of much interest to Tulip collectors (see illustration page 30). **\$ 2.00** per doz.; **\$ 14.50** per 100

CHERIE (14), beautiful greenish-yellow with green featherings on the outside of petals, a very distinct and artistic flower of uncommon beauty, only a few bulbs available. **\$ 1.75** each

COURT LADY (14), a most unusual colour combination of ivory-white with a broad blotch of leaf-green on outer petals becoming pure white at the edges; a unique coloured variety for special flower arrangements. **\$ 1.00** each

FORMOSA (14), uniform greenish-yellow throughout with a marking of green on the outside, an attractive well-formed flower of great substance and very suitable for artistic flowerwork, one of the latest to bloom. **\$ 2.20** per doz.; **\$ 16.50** per 100

GREENLAND (20), luminous deep Old Rose petals with a broad green central band, which has a diffused creamy-yellow edging; the interior has a fascinating 'Mother of Pearl' sheen over this most attractive and arresting new colour combination. Long lasting and a lovely flower for garden and artistic floral-decoration (see illustration page 30). **\$ 1.80** per doz.; **\$ 14.00** per 100

PIMPERNEL (18), glowing carmine-red with a marking of green on the outside, a most elegant novelty with pointed heavily reflexing petals, of most fascinating beauty. **\$ 2.00** each

VIRIDIFLORA (18), a distinct and curious flower with waved petals, colour pale green margined soft yellow, very elegant and beautiful. **\$ 2.70** per doz.; **\$ 20.00** per 100

VIRIDIFLORA PRAECOX (18), a larger form of Tulipa viridiflora, very distinct. **50 cts** each; **\$ 5.00** per doz.

Fosteriana Tulips

It is not somewhat remarkable to think that after more than three centuries of careful cultivation and hybridising, Western Europe has not been able to produce anything to match in size and brilliancy of colour with these Bokhara Tulips growing wild on the mountain slopes of the Asiatic desert. We may, however, predict that by the influence of *Tulipa Fosteriana* in course of time an extremely large new strain of Tulips will be produced that will stand out in size and colour such as *Tulipa Fosteriana* Red Emperor (Mad. Lefeber), Holland's Glory etc. Plant *Fosteriana* Tulips 4 inches deep.

NEW FOSTERIANA MIXED HYBRID TULIPS, we offer a very fine Mixture of colours of these new Masterpiece Tulips which come from a crossing between *Fosteriana* and *Kaufmanniana* Tulips. They produce many different pastel shades and have most wonderful conspicuous coloured hearts and are exceptionally choice, exotic, fascinating and beautiful (see illustration page 47).

\$ 1.70 per doz.; \$ 12.50 per 100

ALBAS (16), long, well-shaped flower of dull buff-rose, inside pure white conspicuous yellow base, when fully opened it gives the impression of a totally white appearance, very outstanding in its section (see illustration page 37).

40 cts each; \$ 4.00 per doz.

CANOPUS (24), the exceptionally brilliant colour of this vivid red Tulip is indeed fascinating, producing a plant of strong growth and stands up to adverse weather conditions. Ideal for beauty spots in the garden where a startling effect is desired.

\$ 1.60 per doz.; \$ 11.75 per 100

CANTATA (12), an outstanding variety with handsome vermilion-red flowers forming a vivid contrast to the shiny green foliage.

\$ 2.00 per doz.; \$ 15.00 per 100

CHERRY FLIP (18), a remarkable introduction with large creamy-white flowers having yellow stamens and a golden-yellow base edged with scarlet markings, exterior of outer petals carmine edged white, when fully opened flowers measure 9 inches across, fine sturdy plant.

\$ 2.00 per doz.; \$ 15.00 per 100

CZARDAS (12), an exceptionally brilliant colour of flaming orange-scarlet, a most fascinating large Tulip highly appreciated as a garden plant where it creates a striking effect.

\$ 1.80 per doz.; \$ 13.25 per 100

EASTER PARADE (15), A.M. R.H.S. 1954, a beautiful coloured *Fosteriana* hybrid of pure yellow, flushed red, the centre is yellow with a red margin at base, a magnificent flower of great size.

\$ 2.00 per doz.; \$ 15.00 per 100

FEU SUPERBE (18), most fascinating colour of bright oriental red, an exceptionally well-formed flower of grand quality and smooth texture on a sturdy stem, a very ornamental plant in the rock-garden with great lasting qualities.

\$ 1.80 per doz.; \$ 13.25 per 100

GOLD BEATER (12), rich golden-yellow throughout, a most sensational and outstanding hybrid, producing large flowers of a beautiful shape and texture borne on sturdy stems.

\$ 2.70 per doz.; \$ 20.00 per 100

PINKEEN (20), a new immaculate novelty of great merit and charm with large longish flowers of a peculiar penetrating orange-cerise-pink turning in a new shade of rose as the flower develops. One of the most remarkable yet noble Tulips we have seen to-date. Strong sturdy plant greatly resembling Red Emperor (Mad. Lefeber) in type height and carriage, flowering at the same time.

50 cts each; \$ 5.00 per doz.

PRINCEPS (16), exceptionally fine large vermilion-scarlet flowers, borne on short stems, highly recommended for the rock garden.

\$ 1.60 per doz.; \$ 11.75 per 100

RED EMPEROR (MAD. LEFEBER) (20), F.C.C. Haarlem, positively the most beautiful Tulip under cultivation, colossal blooms on erect stems of an indescribably magnificent and vivid blazing orange-vermilion-scarlet, base black bordered yellow. Very sturdy grower and one of the earliest to bloom. Strongly recommended (see illustration page 47).

\$ 1.50 per doz.; \$ 11.00 per 100

RED RIBAND (18), A.M. Haarlem 1949, a gorgeous variety of brilliant red with bright yellow on the base, black edged, a very handsome flower of enormous substance borne on a rigid stem, a very showy garden Tulip, flowering in the second half of April.

\$ 1.60 per doz.; \$ 11.75 per 100

WHITE EMPEROR (PURISSIMA) (20), A.M. Haarlem 1949, the only white variety that has ever been raised in this section, the colour is milky white, very remarkable large flowers, long lasting and constantly fresh looking, its effect is of delicate loveliness.

\$ 2.00 per doz.; \$ 15.00 per 100

Kaufmanniana Tulips

One of the most remarkable groups of Hybrids of recent introduction form the beautiful Tulipa Kaufmanniana. They flower far ahead of other Tulips on short stems and establish themselves easily, coming up freely year after year without any care. Most of them have mottled, striped, or spotted foliage like Greigii, which is a beautiful and interesting characteristic on its own. We very strongly recommend them for the rock-garden, border and other places where they can be left undisturbed.

ELITE MIXTURE (PEACOCK TULIPS), a very fine mixture raised from Greigii × Kaufmanniana which will be found to include many surprise-seedlings of unusual colour combinations and interesting mottled foliage (see illustration page 47). \$ 1.75 per doz.; \$ 13.00 per 100

KAUFMANNIANA (WATERLILY TULIP) (Central Asia) (6), charming species producing in March large flowers of elegant form and remarkable beauty, colour soft creamy-white centre slightly marked with carmine-red, strongly recommended for planting in groups in borders and in rock-gardens, may be left undisturbed for years. \$ 1.60 per doz.; \$ 11.75 per 100

ALFRED CORTOT (8), an outstanding Hybrid on account of its striking colour of glowing bright scarlet with a jet-black base and beautifully mottled leaves. Highly commended at R.H.S. Wisley trials 1948, early flowering. 40 cts each; \$ 4.00 per doz.

Botanical Tulip Species

Some of the Tulip Species are very scarce, therefore please order early to ensure delivery. A large number of the dainty and small species like Linifolia, Batalinii, Eichleri, etc., are especially recommended for the rock-garden where the little groups of flowers are best seen to advantage, and multiply their excitement and glory in early spring. Tulip Species may be left undisturbed for years.

COLLECTIONS OF RARE TULIP SPECIES

As in all collections of bulbs offered in this catalogue, the collections of Rare Tulip Species are made up very carefully, containing the best and most interesting for the rock-garden and other choice places.

Daffodils and Narcissi

The beauty of the Daffodil and the Narcissus is unquestioned and the fascination of the new varieties which appear each year gives proof of the ever growing interest and keen competition to obtain new varieties both by the Trade and the Collector, many of whom spend a life-time in experimenting and hoping for a new attraction.

Some confusion sometimes arises when Daffodils are referred to as Narcissi. The term Narcissi is the common name since the Daffodils are that section of the genus which gives long trumpets and the commonly called Narcissi are the short-cupped and crown types. It is well to be clear as to the description of the bulbs offered in our Catalogue. A Mother bulb is composed of a number of old and young portions which will give three to four blooms, a Double Nosed bulb has two or more Flowering 'noses' enclosed in one outer skin and generally gives two and more flowers. A round bulb has no offsets and gives one to two blooms. We handle only Double-Nosed and Mother Bulbs.

Naturalizing Daffodils and Narcissi in Grass etc. All Daffodils and Narcissi are suitable for naturalizing but in very heavy soils, preference should be given to stronger growing kinds e.i. Trumpet varieties and many Large-Cupped. They are all admirably adaptable for grassy slopes and banks, where they should be freely planted. A splendid effect is obtained when Trumpet and other varieties are grouped separately, scattered on the ground and planted where they fall.

Soil and its Treatment. Daffodils and Narcissi will thrive in any well-cultivated and well-drained garden soil. In preparing the ground for planting, dig deeply and if well rotted stable or cow manure is available this may advantageously be worked in 18 to 20 inches deep so as not to come into immediate contact with the bulbs. Never use fresh manure of any kind at planting time. On poor and dry sandy soils we recommend a dressing of sulphate of potash at a rate of about 1 oz. per square yard to be sprinkled over the surface of the ground after planting.

Growing Daffodils in the greenhouse or indoors. All types of Daffodils and Narcissi are suitable for this purpose. Pot up the bulbs on arrival and if ordinary pots are used take a good loamy soil, adding sufficient sand and peat to keep the mixture open. A light dusting of bone meal is also useful. Pot firmly in well-crooked pots. For bowls without drainage holes use a good fibre. Plunge the pots and/or bowls in the coolest place of your garden and in the absence of garden space the pots may be placed in a cool cellar (35-40°F) where watering from time to time is necessary. When the shoots are about 4 inches long and the flower buds well out of the neck of the bulbs, the pots may be removed into a warm room. Heat should be gradually increased from 50° to max. 60°F.

It is advisable to remove the foliage of the sideshoots, if these do not show a flower bud. Just before the buds are open, water should be spread lightly over the buds, when they are in bloom less water should be applied.

Revised System for the Classification of Daffodils, in use since January 1, 1950.

The whole Genus is now classified in eleven Divisions as follows:

- AIR MARSHALL** (Large-Cupped 2a), A.M. R.H.S. 1957, a large flower with very broad widespread perianth of intense glistening golden yellow, rather straight cup of bright orange-red, slightly paler at the base and nicely frilled at mouth. A striking variety of wonderful form, a tall upstanding plant.
\$ 1.75 each
- APRICOT BEAUTY** (Large-Cupped 2b), A.M. Haarlem 1954, most graceful and lovely flower, spreading ivory-white perianth and large frilled flat crown of a beautiful apricot colouring, which does not readily fade; a very charming show-flower.
75 cts each; \$ 7.50 per doz.
- APRICOT DISTINCTION** (Small-Cupped 3a), A.M. Haarlem, a very rare and distinct novelty with pure apricot coloured perianth and brilliant orange cup, evoked a great deal of attention at our stand at the 1960 R.H.S. Daffodil Show (see illustration page 58).
60 cts each; \$ 6.00 per doz.
- ARBAR** (Large-Cupped 2b), A.M. (e) R.H.S. 1959, a most wonderful large flower of perfect form and substance; the pure white perianth is very broad and flat with a large saucer-shaped cup of deep reddish-orange, which stands sun reasonably well.
\$ 2.50 each
- ARCTIC GOLD** (Yellow Trumpet 1a), A.M. R.H.S. 1959, the broad overlapping deep golden yellow perianth is of smooth waxy texture, and the well-proportioned trumpet is widely flanged and serrated at the mouth. The whole flower is of a deeper gold than Goldcourt.
\$ 1.75 each
- ARMADA** (Large-Cupped 2a), F.C.C. R.H.S. 1947, an outstanding and magnificent novelty raised by Mr. Guy L. Wilson which caused a real sensation when first introduced, a well posed 4½ inches in diameter flower with smooth, broad, much overlapping intense deep yellow perianth and deep tangerine-red orange cup-shaped crown, 1 in. long and about 1½ in. in diameter at its frilled and expanded mouth, truly a most striking and early flower, vigorous grower.
60 cts each; \$ 6.00 per doz.
- AVE** (Large-Cupped 2c), a most perfect large absolutely pure white flower of flawless smoothness and symmetry, having broad pointed flat perianth standing at right angles to the large well-balanced crown, a large crowned Leedsii under the old classification.
\$ 1.35 each
- AVENGER** (Large-Cupped 2b), a very fine flower probably the best red and white large cup yet introduced, perfectly round and flat perianth of wonderful smooth velvety texture and immense substance, bearing a large almost flat crown of intense deep orange-red slightly serrated at the edge. A magnificent show-flower.
\$ 21.00 each
- BACCARAT** (Miscellaneous 11), a new type of Narcissus known as split-cupped Daffodils, with beautiful reflexing petals while the deep golden yellow, heavily split crown covers the soft yellow perianth like a single Camellia flower, most valuable for artistic flower work.
\$ 4.00 each
- BALLYCASTLE** (Small-Cupped 3b), one of the most charming and attractive flowers which attracted considerable attention as a show-flower; pure white perianth, shallow white crown daintily illuminated by a sparkling golden rim.
\$ 1.00 each
- BALLYKNOCK** (Bicolor Trumpet 1b), a charming very neat, sturdy, well constructed bicolor trumpet of very good substance with rather short neck and perfectly flat perianth which reflexes slightly as the flower ages; it has a flawless smoothness and is exquisitely fine textured with quality throughout.
\$ 19.60 each
- BASTION** (Yellow Trumpet 1a), A.M. R.H.S. and Midland Daffodil Society, a late flowering deep self-golden trumpet of fine quality and substance, having very broad flat smooth perianth standing at right angles to the rather long straight-sided trumpet, splendid for exhibition.

BORDER CHIEF (Large-Cupped 2a), A.M. R.H.S. 1959, a large flower with bright golden yellow perianth, of grand quality and a large expanding bowl shaped crown of intense deep orange-red, one of the most outstanding novelties in the red and yellow section. **\$ 4.20 each**

BROUGHSHANE (White Trumpet 1c), A.M. R.H.S. and Haarlem 1948, a glorious giant white trumpet of perfect form and balance, the noble trumpet being widely flanged, reflexed and frilled, does not overbalance the immense perianth which is fully 5½ inches in diameter, the outer segments being up to 2½ inches wide, the great flower which is of immense substance and quite exceptionally durable, is carried on a strong stem and has very broad foliage. **50 cts each; \$ 5.00 per doz.**

BRYHER (Small-Cupped 3c), a wonderful Silver Coin seedling with very large broad rounded white perianth of lovely quality and a small white eye with green centre, tall vigorous plant. **65 cts each; \$ 6.50 per doz.**

CANTATRICE (White Trumpet 1c), F.C.C. R.H.S., this variety has recorded a remarkable triumph at the various flower-shows all over the world and leads the field for grace and beauty of form. A flower of a most exquisite and smooth texture, clean cut pointed even perianth standing out sharply from the well-balanced perfectly smooth rather slender trumpet, absolutely pure clear-white throughout, a perfect beauty, for several years voted the second best variety for exhibition. **70 cts each; \$ 7.00 per doz.**

CASTLE OF MEY (Large-Cupped 2c), a very beautiful pure ice-white near trumpet of medium size and perfect quality without flaw; clean cut pointed satin smooth perianth and nicely flanged trumpet-shaped crown with no yellow but a tint of cool sea-green in its base. Free bloomer and increaser, very strong stem and short neck. **\$ 8.40 each**

CEYLON (Large-Cupped 2a), F.C.C. R.H.S. 1948, one of the most magnificent red and yellow flowers seen up to date, a flower of beautiful form and proportion, with broad smooth shovel-pointed overlapping perianth of deep intense aureolin gold that has an almost metallic sheen and a goffered goblet-shaped crown of dark, clear intense cadmium orange-red, quite sunproof, tall robust plant. **60 cts each; \$ 6.00 per doz.**

CHARITY MAY (Cyclamineus 6a), F.C.C. (g), A.M. (e) R.H.S. and Haarlem, clear self coloured yellow cyclamineus hybrid of a very charming character with broad reflexed petals and elegantly formed cup, slightly expanded and frilled at mouth. **\$ 3.50 per doz.; \$ 24.00 per 100**

CHINESE WHITE (Small-Cupped 3c), F.C.C. R.H.S. and Haarlem 1950 very large flower of quite faultless form and quality, pure-white throughout except for a faint touch of green in the eye, perfectly proportioned shallow-fluted saucer crown, a superb show-flower, quite unique. **85 cts each; \$ 8.50 per doz.**

CLONMORE (Yellow Trumpet 1a), F.C.C. Wisley Trials 1959, a remarkable fine large rich golden trumpet, having a broad perianth and a well flanged and serrated trumpet, exceptionally vigorous, free of bloom and increase, a good show flower and glorious garden plant. **60 cts each; \$ 6.00 per doz.**

CONTENT (Bicolor Trumpet 1b), A.M. R.H.S., a very large and quite unique trumpet, the noble perianth is built of broad long flat petals of a fine smooth quality and substance. When first opening it is a uniform tone of lovely soft greenish primrose throughout gradually passing to a very pale lemon-white all over, except the brim of the long graceful trumpet which retains a dainty frill of lemon, very vigorous grower. **50 cts each; \$ 5.00 per doz.**

COROFIN (Small-Cupped 3b), a really lovely medium-sized flower with very broad rounded snow-white perianth of immensely thick waxy substance; the yellow eye is almost flat with a broad crinkled margin of bright red, an ideal showy-flower on a tall stiff stem. **\$ 1.00 each**

CRAIGYWARREN (Large-Cupped 2a), a large flower of fine quality and solid texture, much overlapping deep yellow perianth and a beautifully proportioned crimson-red crown, first class. **35 cts each; \$ 3.50 per doz.**

CUSHENDALL (Small-Cupped 3c), A.M. R.H.S., in our opinion the best green-eyed flower under cultivation; it is of faultless form, quality and splendid substance, broad smooth circular overlapping perianth of purest sparkling Poeticus-white, very shallow saucer crown edged with a delicate cream-coloured frill, centre is a lovely moss-green, very late. **60 cts each; \$ 6.00 per doz.**

DAVIOT (Large-Cupped 2b), A.M. R.H.S. 1953, a distinct flower of exceptional charm, grace and refinement, the clear pure white perianth, which has a hint of cool green shading where the petals join the crown, is of a most lovely quality. The rather goblet-shaped crown is clear bright orange coral, shading towards primrose at the rim. Vigorous grower. **85 cts each; \$ 8.50 per doz.**

DOMINATOR (Yellow Trumpet 1a), A.M. Haarlem 1948, a real giant among the trumpets and a wonderful Daffodil in size and substance, balance and proportion, broad thick overlapping perianth of deep golden yellow, with large serrated golden yellow trumpet, a magnificent flower for garden and exhibition.

50 cts each; \$ 5.00 per doz.

DOUBLE EVENT (Double 4), A.M. R.H.S. 1952, a very round flower, the larger segments are pure white and interspersed among them in the centre are small segments of soft lemon yellow. A very distinct novelty; fine robust plant with strong tall stems. \$ 1.75 each

EMPRESS OF IRELAND (White Trumpet 1c), A.M. R.H.S. 1956, undoubtedly the most impressive and magnificent large white trumpet introduced up to date, a truly majestic flower up to 5 inches in diameter and of faultless form and balance, smooth flat perianth with immense broad segments, well balanced trumpet ideally flanged and frilled at the mouth. A perfect show-flower. \$ 19.60 each

FALAISE (Double 4), a unique double, raised from Mary Copeland; the pollen parent must have been a Poeticus as the petals are of the purest white and the flower has the true Poeticus-scent. The centre is bright orange-red which makes a striking contrast against the rather long pure white inner petals. A lightly built flower well poised on a tall wiry stem, late. 95 cts each

FIREPROOF (Large-Cupped 2a), Highly Commended Wisley Trials 1959, neat medium sized early flower with bright golden perianth and vivid solid orange-red cup, a most valuable garden variety and suffers no fading or burning of the cup. Highly recommended as a garden variety.

45 cts each; \$ 4.50 per doz.

FOXHUNTER (Large-Cupped 2a), a fine red and yellow like a much improved Saltash as it has a strong stem and good neck, a flower of refined quality, beautiful for form and proportion with wide-spread perfectly flat and smooth sharp pointed clear rich yellow perianth and well proportioned rather narrow and long rich orange-red crown. \$ 2.10 each

FRIGID (Small-Cupped 3c), F.C.C. R.H.S. 1950, one of the very latest to bloom in May, broad smooth pointed perianth measuring about 4 inches with smallish fluted almost flat crown, the whole flower is purest icy-white throughout except for a most lovely vivid emerald-eye.

40 cts each; \$ 4.00 per doz.

GALWAY (Large-Cupped 2a), F.C.C. R.H.S. 1948, a magnificent tall strong-stemmed intense self golden flower, bordering on Trumpet proportions, broad smooth perianth, well flanged trumpet crown; it is a glorious garden plant owing to its texture, excellent for exhibition.

\$ 3.00 per doz.; \$ 21.00 per 100

GLENDERMOTT (Large-Cupped 2c), a superb pure white flower on the border line between Div. 1 and Div. 2, a plant of great vigour and truly magnificent habit, with strong upright blue-green foliage and very strong tall stem and short neck, a big flower of great substance with very broad smooth flat perianth and beautifully proportioned flanged trumpetlike crown, which is green at base. \$ 18.20 each

GLENSHESK (White Trumpet 1c), A.M. R.H.S. 1950, a noble White Trumpet of great size, almost 5 inches in diameter, beautiful thick smooth waxy substance, well posed on a stout 18 inch. stem; the trumpet is faint primrose on first opening but soon passes to pure white. \$ 3.00 each

GOLDCOURT (Yellow Trumpet 1a), F.C.C. R.H.S. 1947, a perfectly formed trumpet of good substance and beauty; smooth flat overlapping pointed segments and well-balanced not too wide a trumpet of pure maximus gold throughout. 35 cts each; \$ 3.50 per doz.

Strong grower. **\$ 1.00 each**

MAHEE (Yellow Trumpet 1a), a faultless show-flower after the style of Virtue in form and finish; deep pure self-gold with broad flat smooth perianth, standing squarely at right angles to the perfectly proportioned neatly flanged and serrated trumpet. A most valuable addition to late exhibition flowers as it comes when most other yellow trumpets are over. **\$ 2.10 each**

MANDATE (White Trumpet 1c), large tall stately flower of very high quality having a very broad satin smooth even pure white perianth and a long well proportioned smooth trumpet which opens cream and passes to white. **\$ 1.50 each**

MASKED LIGHT (Large-Cupped 2a), a flower of wonderful colouring, broad beautiful smooth flat perianth of great substance of deep golden yellow with a flush of orange in the petals. The large cup is deep glowing orange-red nicely serrated and slightly flanged at mouth. **\$ 1.45 each**

MATAPAN (Small-Cupped 3b), a lovely quality flower of medium size with flat, very round, beautifully smooth perianth of the purest white and a flat crown of intense crimson. Valuable as a show-flower on account of its earliness for a flower of this type. **85 cts each; \$ 8.50 per doz.**

MILANION (Yellow Trumpet 1a), A.M. R.H.S. 1949, a large flower of very clear golden yellow, broad rather pointed smooth perianth, spreading out at right angles to the not too wide but most beautifully flanged trumpet; the flowers are short-necked and carried on tall stems. **50 cts each; \$ 5.00 per doz.**

MOONSTRUCK (Yellow Trumpet 1a), F.C.C. A.M. R.H.S. 1951, the largest and most robust of the yellow Trumpet Section, an immense flower having broad pointed perianth of clear lemon primrose, standing at right angles to the noble flanged and serrated trumpet which is of a similar pale tone, but strikingly illuminated by the serrated brim being tipped with bright lemon. **\$ 1.15 each**

NEWCASTLE (Bicolor Trumpet 1b), A.M. R.H.S., a first class exhibition flower of great size, perfect form and exceptionally thick waxy texture, very broad smooth flat pure white perianth standing at right angles to the perfectly proportioned deep golden trumpet which does not fade as the flower ages. **\$ 28.00 each**

NINTH LANCER (Large-Cupped 2a), very large flower of superb quality and solid texture, much overlapping deep yellow perianth and a beautifully proportioned deep orange-red cup. A splendid exhibition flower of long lasting qualities. **\$ 1.50 each**

NORTHERN LIGHT (Large-Cupped 2b), truly a magnificent and striking flower, with broad well-overlapped pure white perianth of lovely quality and substance and a large saucer shaped crown of solid bright glowing orange-red. An outstanding flower in every way. **\$ 14.00 each**

OKLAHOMA (Bicolor Trumpet 1b), A.M. Haarlem 1948, an exquisite Bicolor Trumpet of superb quality and perfect form, very broad smooth flat pure white perianth and large deep golden yellow trumpet, a very vigorous grower of unusual substance. **50 cts each; \$ 5.00 per doz.**

PARKMORE (Large-Cupped 2c), A.M. R.H.S. 1947, a fine flower of solid texture and beautiful poise with broad smooth, flat, pure white perianth of great substance and neatly flanged trumpet crown of faintest lemon passing to white; short neck and very strong stem, which carries the flower well above the strong upright foliage. **45 cts each; \$ 4.50 per doz.**

PERIDOT (Small-Cupped 3b), very late medium sized flower of exquisite quality, satin smooth milk-white perianth, shallow saucer shaped crown; very pale primrose shading to soft green base; good strong stem and neck. **\$ 7.00 each**

PERSONALITY (Large-Cupped 2b), a lovely large flower of very high quality and particularly clean appearance having an absolutely smooth and flat pure white perianth, standing at right angles to the very distinct smooth cool lemon crown, which has a clearly cut off rim without flange or frill; good doer and free of bloom and increase. **\$ 1.00 each**

PETSAMO (White Trumpet 1c), A.M. R.H.S. 1950, a very fine flower, the perianth is immensely broad, the breadth of the outer segments which overlap each other being greater than their length. The trumpet is beautifully proportioned with a widely flanged and rolled mouth. **45 cts each; \$ 4.50 per doz.**

PREAMBLE (Bicolor Trumpet 1b), F.C.C. R.H.S. 1949, a first early well-contrasted clean Bicolor of superb quality, opening with smooth flat pure white perianth and very rich bright chrome-yellow trumpet which has a little neat flange; as the flower ages the rich colour of the trumpet fades out a little becoming more lemon in tone but never goes white (see illustration page 43). **70 cts each; \$ 7.00 per doz.**

PRESTIGE (White Trumpet 1c), A.M. R.H.S., a very large flower of great substance, beautiful quality and fine carriage, very broad smooth pointed pure white perianth, bold smooth trumpet, opening very faint primrose and passing to white; strong stem and short neck. **90 cts each; \$ 9.00 per doz.**

- RASHEE** (White Trumpet 1c), a most exquisite flower of the highest quality, faultless texture and proportion, broad pointed perianth, beautifully finished trumpet with a deep smoothly rolled flange at the mouth; the flower, which is carried on a tall stem is absolutely pure icy-white throughout with a touch of cold sea-green in the base of the trumpet. **\$ 5.60 each**
- RED APRIL** (Large-Cupped 2b), the broad white overlapping perianth is of good substance and quality, the large bowl shaped cup is intense vivid red, a very striking large flower resembling Kilworth but has the great advantage of flowering earlier. Tall strong plant. **70 cts each; \$ 7.00 per doz.**
- REVELRY**, see page 59.
- ROCKALL** (Small-Cupped 3b), A.M. R.H.S. 1959, broad, perfectly formed perianth of pure waxy white with somewhat pointed petals and a beautiful flaming red cup of a brilliancy never seen in any other flower, a variety of exceptional grace and colour. **\$ 30.80 each**
- ROCOCO** (Large-Cupped 2b), F.C.C. Haarlem, a striking effective show-flower of solid texture and outstanding quality, the broad well-overlapped perianth segments are pure white, whilst the well-proportioned flat crown is soft yellow with a broad orange ribbon edge, very vigorous. **50 cts each; \$ 5.00 per doz.**
- ROIMOND** (Large-Cupped 2b), a really magnificent red and white flower with very broad rounded overlapping perianth of excellent substance and a large saucer shaped crown of brightest orange red, nicely frilled at the edge; this flower is sunproof and must be left on the plant to develop the colour in the crown which is quite greenish orange on opening. **70 cts each; \$ 7.00 per doz.**
- ROUGE**, see page 59.
- ROYAL ORANGE** (Large-Cupped 2b), A.M. Haarlem 1954, a most fascinating flower of immense size of pure white and red, the white perianth segments are broad, round and well-overlapped; the remarkably large flat crown is of a most intense orange-red colour. An exceptional beautiful colour combination and a real sensation on the show table. **\$ 7.00 each**
- ROYAL RANSOM** (Large-Cupped 2a), A.M. Haarlem 1955, very large flower of a showy and striking character, with broad, shovel-pointed, heavy textured segments, of a soft buff colour, which turns to pinkish as flower ages; medium-sized orange-red crown. **\$ 3.00 per doz.; \$ 21.00 per 100**
- SALMON TROUT**, see under pink Daffodils, page 51.
- SAMITE** (White Trumpet 1c), F.C.C. (e) A.M. (e.g.) R.H.S., another recent introduction of superlative quality and exquisite self-ivory-white flower of most perfect form and balance and the very finest and smoothest thick velvety texture, tall vigorous plant. **50 cts each; \$ 5.00 per doz.**
- SANTA CLAUS** (Double 4), F.C.C. R.H.S. 1950, a very round, fully double flower of the purest white and most perfect symmetry and form; the segments of this lovely double poeticus are very flat, broad and overlap almost to the top edge so that the flower has the appearance of a beautiful white double Camellia, a unique flower of great charm and beauty with a true Poeticus perfume. May-flowering. **\$ 28.00 each**
- SHANTALLOW** (Small-Cupped 3b), a charming flower of quite enchanting beauty, having broad slightly recurving perianth of sparkling poeticus white and splendid substance and texture; the small cup is usually entirely moss green on the day of opening, but quickly passes to faint citron-white with a green centre and a delicate rim of faint lemon-green. **\$ 12.60 each**
- SHEEROE** (Large-Cupped 2a), although a rather small flower, it is quite beautiful in colour and texture, it has a clear yellow perianth and its crown is coloured the brightest orange-scarlet possible, which is completely sunproof. **\$ 4.90 each**
- SIGNAL LIGHT** (Large-Cupped 2b), A.M. R.H.S. 1954, the broad rounded overlapping perianth is pure white and of great substance and quality, the very large saucer shaped crown is an inch and three quarters across, bright glowing orange-red with a slight frill. One of the most striking red and white flowers which is practically sunproof. **\$ 1.75 each**
- SILVER LINING** (Large-Cupped 2c), A.M. Haarlem 1948, a fine show-flower of most perfect symmetry and balance, with smooth pure white perianth of great substance and trumpet-shaped crown of pale creamy-white, which passes to white when flower ages. **50 cts each; \$ 5.00 per doz.**
- SLIEVEBOY** (Yellow Trumpet 1a), a large self-coloured yellow trumpet of perfect form and balance and superb satin-smooth texture. Flowers are carried on stiff stems of good length well above the upright green foliage. **\$ 4.20 each**
- SPELLBINDER** (Reversed Trumpet 1d), A.M. R.H.S. and Haarlem, a large flower of the most wonderful and quite distinct clear luminous greeny sulphur-lemon; when fully developed the inside of the flanged trumpet passes almost to white, while the outside of the trumpet retains its colour and the serrated brim is tipped with sparkling lemon, most attractive and always much admired. **70 cts each; \$ 7.00 per doz.**
- SUN CHARIOT** (Large-Cupped 2a), A.M. R.H.S. 1951, F.C.C. Haarlem 1956, a large and striking flower of enormous size, the broad flat rather pointed perianth is deep golden-yellow and the well-proportioned goblet-shaped cup is solid glowing orange-red, sunproof and very lasting. **60 cts each; \$ 6.00 per doz.**

- SWANSDOWN** (Double 4), A.M. Haarlem 1951, this beautiful double variety is quite distinct from any other; large milk-white flower of great substance with very broad circular overlapping outer segments and a double centre of white feathery looking petals, very attractive. **\$ 1.40 each**
- TEHERAN** (Large-Cupped 2a), a very striking flower of brilliant colouring, the very broad well-overlapped round perianth is deepest golden yellow and of a great substance and the large almost flat saucer shaped crown is intense deep vivid red slightly frilled at the edge. This flower is sunproof. **45 cts each; \$ 4.50 per doz.**
- TROUSSEAU** (Bicolor Trumpet 1b), F.C.C. (e) A.M. R.H.S. 1947, an exquisite Bicolor Trumpet of superb quality, perfect form, great substance and fine satin-like texture, very broad smooth flat pure white perianth and well proportioned straight neatly flanged trumpet which opens soft-yellow and passes gradually to a most lovely rich buff rosy-cream. **\$ 3.00 per doz.; \$ 21.00 per 100**
- TRUTH** (Large-Cupped 2c), F.C.C. (e) A.M. R.H.S. 1956, the very flat and smooth perianth stands at right angles to the beautifully formed and evenly flanged large trumpet-shaped crown, purest white throughout, a flower of faultless form and exceptional quality. **50 cts each; \$ 5.00 per doz.**
- TUDOR KING** (Bicolor Trumpet 1b), a brilliantly contrasted bicolor trumpet of very high quality with broad, flat, very smooth pure white perianth of great substance, and nicely proportioned long trumpet of deep lemon yellow widely flanged and serrated at the mouth. **\$ 4.20 each**
- TUDOR MINSTREL** (Large-Cupped 2b), A.M. R.H.S. 1950. Very symmetrical large flower, broad overlapping pure white perianth of thick waxy substance and a beautiful widely expanded crown of solid orange-yellow, a flower of the highest quality for its fine proportions and perfect carriage. **\$ 1.40 each**
- TULYAR** (Small-Cupped 3b), A.M. R.H.S. 1958, an almost perfect flower with beautifully smooth snow-white perianth very round and perfectly flat. The eye is almost flat of deep intense red. Fine show-flower. **\$ 1.75 each**
- TUSKAR LIGHT** (Large-Cupped 2b), very large flower with a broad, flat pure white perianth of splendid substance and a very large, flat pale citron crown with a broad margin of clear bright red, a most effective exhibition-flower. **60 cts each; \$ 6.00 per doz.**
- ULSTER PRINCE** (Yellow Trumpet 1a), A.M. Wisley Trials 1959, a large rich self coloured golden trumpet of first class quality and substance, broad pointed smooth perianth and well proportioned flanged trumpet; remarkably durable flower on a strong stem and short neck. **\$ 1.00 each**
- VIGIL** (White Trumpet 1c), A.M. R.H.S. 1956, a really superb very large pure icy-white trumpet of fine parchment-like texture, having a broad sharp pointed perianth and gracefully proportioned well-flanged trumpet. Strong grower with beautiful blue-green foliage. **\$ 6.30 each**
- VIRTUE** (Large-Cupped 2a), A.M. R.H.S. 1950, a flower of the firmest texture and beautiful self clear brilliant golden yellow, being of faultless symmetry and quality; broad, perfectly smooth, flat perianth of model form standing at right angles to the straight sided nicely flanged and serrated trumpet, excellent exhibition-flower. **85 cts each; \$ 8.50 per doz.**
- WEXFORD** (Yellow Trumpet 1a), a medium sized flower of very fine smooth quality of a uniform clear soft golden yellow colour throughout, the perianth segments are beautiful smooth and flat, slightly shovel-pointed, standing at right angles to the trumpet, which is nicely expanded and frilled at the mouth. This flower is a trumpet but very near the border line, strong robust plant. **70 cts each; \$ 7.00 per doz.**
- WHITE LION** (Double 4), F.C.C. Haarlem, A.M. Wisley 1958, this very striking novelty is entirely distinct from any other, producing a large waxy-white flower of fine substance, very broad overlapping outer segments, with a centre of double petals slightly intermingled with soft yellow, very strong plant. **\$ 3.00 per doz.; \$ 21.00 per 100**
- WHITE PRINCE** (White Trumpet 1c), very large ice-white trumpet of absolutely ideal form, proportion and balance, we are induced to list this variety because it has been most enthusiastically admired here, a leading amateur writes us he considers it the best white trumpet he has yet seen. **\$ 14.00 each**
- WINNIPEG** (Large-Cupped 2a), a fine bold flower with broad overlapping rich yellow perianth of good substance and a large expanding saucer-shaped crown of deep yellow broadly banded with bright orange-red. **70 cts each; \$ 7.00 per doz.**
- WOODVALE** (Large-Cupped 2c), a most lovely large flower of exquisite quality with broad satin smooth pure white perianth, perfectly balanced trumpet crown, white at the base, flushed and rimmed with pale green lemon, a delightful piece of cool colouring and a magnificent exhibition flower. **\$ 1.50 each**

Division I - Trumpet Narcissi

Distinguished characters: One flower to a stem; Trumpet or Corona as long as, or longer than the perianth segments.

DIVISION IA - YELLOW TRUMPETS

Yellow- and sulphur-coloured Trumpet Narcissi

CROMARTY (16), A.M. (e.g.) R.H.S., this trumpet of faultless form and beautiful quality has a broad smooth flat perianth standing at right angles to the neatly flanged and serrated trumpet, ideal garden plant of great lasting power, moreover a perfect exhibition flower of faultless form, finish and colour. **35 cts each; \$ 3.50 per doz.**

DUTCH MASTER (20), A.M. (p) R.H.S. 1948, a rich golden-yellow trumpet of a remarkable refined form, broad overlapping perianth with a deeply serrated large trumpet, a vigorous grower, excellent forcer and fine show-flower (see illustration page 48). **\$ 2.90 per doz.; \$ 21.50 per 100**

GARRON (24), A.M. (e.g.) R.H.S. and Haarlem 1948, a magnificent refined flower of unusual quality and size, has a great long pointed and slightly waved perianth of smoothest velvety texture and thick substance, trumpet nicely serrated of beautiful deep clear primrose or soft full self lemon, enormously vigorous and grand garden plant. **\$ 2.70 per doz.; \$ 20.00 per 100**

GOLDEN HARVEST (22), F.C.C. E.F.A. Haarlem, this brilliant Daffodil of uniform rich golden yellow with heavily serrated trumpet and lovely form, has now become one of the most popular varieties in cultivation, admired for its strong texture and its wealth of flowers either forced in pots or planted in the garden, enormous flowers and one of the first to bloom. **\$ 2.55 per doz.; \$ 19.00 per 100**

JOSEPH McLEOD (24), F.C.C. Haarlem 1956, F.C.C. Wisley 1959, a refined new Daffodil of a self-coloured golden yellow, perfectly formed well-overlapping perianth standing at right angles to the well-balanced trumpet, which is deeply frilled at mouth, very free flowering. **\$ 2.70 per doz.; \$ 20.00 per 100**

J. S. BACH (22), a very close competitor if not an equal to 'Flower Carpet', a variety of which the Dutch Growers have great expectations. The colour is uniform primrose-yellow, strong grower of very free flowering habit, good forcer and fine garden variety. **\$ 2.50 per doz.; \$ 18.50 per 100**

KING ALFRED (24), F.C.C. R.H.S. F.A. Haarlem, this remarkably beautiful variety is destined to remain at the head of its class for some time to come yet; its rich colour of uniform deep golden yellow is outstanding; the large gigantic trumpet is elegantly frilled at mouth and has a broad massive perianth, is of refined finish and of great substance, hence its lasting qualities both outdoors or when cut. One of the earliest to bloom, it is easily forced, very dependable (see illustration page 53).

\$ 2.50 per doz.; \$ 18.50 per 100

MAGNIFICENCE (20), F.C.C. (g.c.) R.H.S. F.C.E.F.A., the first yellow trumpet out, a very large deep golden yellow flower, gracefully waved perianth with deeply serrated trumpet, opens much before the well-known Golden Spur, now superseded.

\$ 2.50 per doz.; \$ 18.50 per 100

MOONRISE (19), F.C.C. Haarlem 1948, a refined Daffodil of uniform lemon yellow throughout with broad overlapping perianth, the elegantly shaped trumpet is slightly expanding at mouth with a finely serrated flange. A strong garden variety and excellent show-flower. **40 cts** each; \$ 4.00 per doz.

PEKING (21), A.M. Haarlem 1947, a very large lemon coloured trumpet of splendid quality and grand substance with somewhat lighter broad pointed, smooth perianth. A very vigorous garden variety of long lasting quality.

\$ 2.80 per doz.; \$ 21.00 per 100

Hyacinths

The Hyacinth like the Tulip is a bulb of great antiquity although it was only brought from Asia to Europe less than four hundred years ago and as well as the Tulip figured in the Dutch Bulb craze of 1635. In the second part of the 18th century France led the fashion in flowers and Madame de Pompadour forced the French Court to adopt the Hyacinths as the fashionable flower giving the trade great prosperity and hence the many French names found among the varieties, such as La Victoire, Grand Maitre, L'Innocence etc., but the Revolution changed this and the Hyacinth came within the reach of all classes and ceased to be the proud exclusive possession of the French Aristocracy.

CULTURE IN POTS

Hyacinths should be potted either in soil or fibre early in September for Christmas flowering and every fortnight thereafter for succession. Plunge pots in the coolest place of the garden, or place in a dark, cool cellar.

After three or four months, remove to the forcing house as required, but care should always be taken that the bulbs are well-rooted and the buds well out of the neck of the bulbs before beginning to force, as successful cultivation depends almost completely on these points. To keep the foliage dwarf and to assist the perfect colouring of the flowers, they should have occasionally a supply of liquid manure during the growing period. Always use clean old pots.

HYACINTHS ON GLASSES

This old-fashioned way is in favour again now that the proper glasses are on the market.

Fill the glass with water (rainwater preferred) almost to touch the base of the bulbs. A few pieces of charcoal should be put in the glass, as this keeps the water clean. The next procedure is the simple one of placing the glasses in any dark cool room, cellar or cupboard until the sprouts are about 3 inches high, then they may be brought gradually to the full light. Although this system of culture is very simple, it is of first importance that the largest size bulbs are obtained.

OUTDOOR CULTURE

For successful cultivation in the open air, Hyacinths may be planted any time from September to December. September and October are the best months; they like a light rich soil, the ground should be well-drained. Plant the bulbs at equal distances apart in circles or in straight lines and about 5 inches deep. Never plant the bulbs when the ground is wet. They require a little covering of straw or a thin layer of leaves during the winter to protect them from frost.

Hyacinths for Bedding

Also suitable for Bowls, Pots, Boxes, Jardines, etc.

These Hyacinths which will give good spikes can be strongly recommended for their excellent quality. They are particularly suitable for large plantings in borders and shrubberies where they will produce a brilliant display. Customers may depend upon getting suitable varieties which will bloom simultaneously when selecting from the following colours. They may also be forced from the middle of January and onwards.

For Indoor and Outdoor

Cynthella Hyacinths

(Dutch Roman or Miniature Hyacinths)

There are scarcely any Hyacinths that give more satisfaction than a group of Miniature Hyacinths. If planted in pots, shallow pans, jardinets, bowls, small wooden boxes etc., they produce a beautiful effect. They are also very charming in large beds and borders, but they should not be planted more than four inches apart.

Miscellaneous Bulbs

Allium

Allium are diverse in form, height and colour but all very ornamental with their gay blooms which come as flat and round heads, gloves or swinging tassels, giving a note of marked distinction to the border in early Summer. Owing to the various sizes of the bulbs it is only possible to give the depth of planting by saying that the bulbs should be covered three times their own depth with soil. They may be planted in borders, or shrubberies, while the smaller varieties are most suitable for the Rock Garden.

AFLATUNENSE, A.M. R.H.S., 1948, a beautiful species from North Persia with a dense spherical umbel of purple-lilac flowers, flowering end of May, height about 2½ feet.

Anemones (Windflowers)

Anemones are amongst the gayest of Spring flowers, the St. Brigid and De Caen being particularly beautiful and richly diversified in colour. Anemones are easy to grow and thrive in any garden soil, plant the tubers about 2 inches deep and 4 inches apart and are most effective when planted in clumps of 12 or so. The St. Brigid and De Caen may also be planted in the Spring to give a succession of gay blooms in the summer. The tubers should be kept in a dry place prior to planting as they are very sensitive to dampness, but a soaking in water for 48 hours before planting will greatly assist germination. A light dressing of nitro-chalk as the buds appear will encourage long stems.

ST. BRIGID (SEMI DOUBLE) (10), we offer a splendid mixture comprising a great many rich colours and very pleasing shades, this lovely Anemone cannot be too highly recommended and should be planted in generous quantities. 65 cts per doz.; \$ 5.00 per 100

***Brodiaea* (Californian Hyacinth)**

These exceptionally beautiful plants are undeservedly neglected as they are quite hardy and easy to grow. They prefer a warm position such as at the foot of a south wall or sunny rockery with a medium soil containing plenty of sand or grit. The bulbs should be planted 4 inches deep and 4 inches apart and should be lifted and replanted every four years.

COCCINEA (Syn. *Brevoortia Ida-Maia*), this grows a compact head of pendulous green, tipped brilliant crimson flowers, one can scarcely exaggerate the attraction and beauty of this most striking and exciting flower, it is perfectly hardy. Height 2 ft, very scarce. **50 cts each; \$ 5.00 per doz.**

IXIODES SPLENDENS, sometimes known as 'Golden Star', umbels of several flowers of a golden deep yellow with dark ray on back of petals, ht. 2 ft. **\$ 1.00 per doz.; \$ 7.50 per 100**

MIXED, very attractive colours. **55 cts per doz.; \$ 4.00 per 100**

***Camassia* (The Quamash)**

These Bulbous rooted plants with graceful linear-shaped leaves and small flowers borne freely in loose racemes on stems two to three feet high in July make handsome plants for the herbaceous border. They prefer a well-drained soil and are not averse from some shade and moisture but a wet soil in winter will ruin the bulbs. Plant 3 inches deep and 9 inches apart, lift and divide every third year.

CUSICKII, producing tall elegant spikes of pale lavender star-shaped flowers with pale golden anthers having a rosette of broad glaucous foliage, height 2 feet, hardy and easy.

\$ 1.10 per doz.; \$ 8.25 per 100

ESCULENTA (BEAR GRASS), produces graceful spikes of showy rich blue flowers, should be planted in groups in the border or for naturalizing in woodlands etc. very striking, plant bulbs 4 inches deep and 4 inches apart, 1½ feet high. **60 cts per doz.; \$ 4.50 per 100**

***Chionodoxa* (Glory of the Snow)**

A genus of small dainty flowering bulbs producing starry little flowers in all their beauty as the snow is melting thus earning the name 'Glory of the Snow'. These extremely hardy bulbs are most effective planted in groups in lawns, banks or under deciduous trees. Plant 3 inches deep and 2 inches apart and as long as they remain healthy do not disturb them but if over-crowded lift when the foliage dies and store until planting again in the Autumn.

GIGANTEA (GRANDIFLORA), a very beautiful and distinct species with very large flowers of a pleasing shade of soft lavender-blue and clear snow-white centre, strong grower. March-April (see illustration page 47). **55 cts per doz.; \$ 4.00 per 100**

GIGANTEA ALBA, most attractive pure white flowers of a very large form, gracefully held on slender stems. **60 cts per doz.; \$ 4.50 per 100**

LUCILIAE PINK GIANT, an exceedingly fine introduction of great merit, producing a very large spike with lovely pink flowers. A real beauty for the rockery on account of its unusual character and colour. **\$ 2.00 per doz.; \$ 15.00 per 100**

LUCILIAE ROSEA, fine little gem producing pretty flowers varying from pale-rose to lilac-rose, plant in drifts for a beautiful effect. **95 cts per doz.; \$ 7.00 per 100**

SARDENSIS, true gentian-blue, is of striking beauty and excellent for massive plantings, cannot be too highly recommended, Sardinia. **55 cts per doz.; \$ 4.00 per 100**

Colchicum (Meadow Saffron)

Autumn flowering:

Colchicum are among the most showy of the Autumn-flowering bulbs with a striking characteristic of thrusting the naked flowers straight from the ground before any foliage appears. The blooms are similar to the Crocus and if left undisturbed will come up year after year while in Spring they will produce a most decorative foliage. They are easy to grow, thriving in any well-drained soil and should be planted 2 inches deep in late August or September, the flowers appear shortly after planting and a broad leafy foliage is produced in the Spring. They can also be grown in a dry state without any water or soil, on the window-sill or in a container indoors.

AUTUMNALE ALBUM, none to offer this year.

AUTUMNALE MINOR, rosy-purple, early, 6 inches high (see illustration page 78).

\$ 1.75 per doz.; \$ 13.00 per 100

AUTUMNALE ROSEUM PLENUM, double rosy-lilac flowers, late flowering.

45 cts each; \$ 4.50 per doz.

BYZANTINUM (MAJOR), producing lovely soft rose coloured star-shaped flowers, perfect form, very free flowering, early.

Winter-Flowering Crocus Species

For their unsurpassed decorative value these Species deserve to be more intensively cultivated, in particular the rather new strain of *Crocus chrysanthus* with their elegantly shaped flowers in delightful colours and rich flowering habit. The flowers begin to appear in February and herald the coming Spring. Plant 3 inches deep and they may be left undisturbed for years and increase rapidly. They are also suitable to gentle forcing under cool conditions.

80 cts per doz.; \$ 6.00 per 100

DUTCH YELLOW MAMMOUTH, a top favourite with large deep golden-yellow flowers produced in great abundance in advance of other Large Dutch Crocus; it is said to be a common plant but probably it is one of the most extraordinary Crocus in cultivation, retaining its undiminished vigour after more than two hundred years of wide cultivation; flowers are sterile and long lasting.

75 cts per doz.; \$ 5.50 per 100; \$ 50.00 per 1000

Cyclamen (Hardy)

The hardy species of Cyclamen are delightful dwarf-growing plants and once established will grow close enough to form a carpet and produce bright little flowers on half shaded rockeries or in clumps in a fairly dry border. They prefer well-drained sites and thrive much better with a little lime rubble incorporated in the soil. The Autumn varieties should be planted about 1-1½ inches deep while the Winter and Spring flowering varieties should only be covered with about 2 inches of soil.

Autumn-flowering; orders should reach us before 15th August

CILICICUM, very beautiful pink flowers with a touch of crimson at the base, borne in great profusion on short stems with beautifully marbled leaves, flowers in September-October. Not hardy in the north.

\$ 2.30 per doz.; \$ 17.00 per 100

Eranthis (Winter Aconite)

Eranthis are one of the earliest of the Spring flowers, the golden buttercup-like blossoms resting on emerald green cushions of leaves produce a most charming effect in the early days of the year. The Tubergenii variety is a cross between cilicica and hyemalis giving large flowers. The tubers should be planted 2 inches deep and rather thickly and will naturalize in a fairly well drained soil.

CILICICA, a very lovely species from Asia Minor, deep yellow, foliage bronzy and more finely cut than *E. hyemalis*, it also blooms a little later.

60 cts per doz.; \$ 4.50 per 100

HYEMALIS, very pretty Buttercup like flowers of bright yellow, may be grown under trees and in moist situations; one of the first flowers to bloom in Spring.

60 cts per doz.; \$ 4.50 per 100

Large-Flowered Freesias

Freesias are indoor bulbs and their exquisite beauty and delicacy together with their delightful fragrance are good reasons for their popularity. Plant six corms in a 5 inch pot in a compost of two parts sandy

Large-Flowered Freesias

loam, one part leaf mould and one part well-decayed manure. After planting place the pots in a cold frame and cover with one inch of soil for about one month, when they may be placed near the glass in a cool greenhouse. Water sparingly but when growth appears gradually increase the supply. If flowers are wanted somewhat earlier temperature in the greenhouse may be gradually increased from 50 to 60 degrees, but this should be done very carefully. It is not possible to grow Freesia in the open, the corms for this culture are specially prepared and can only be supplied in the Spring.

RAINBOW MIXTURE OF FREESIAS, a delightful mixture made up from beautiful and fragrant varieties of a great many lovely shades; such as rose, pink, ruby, salmon, apricot, coppery-bronze, yellow, lavender. 80 cts per doz.; \$ 6.00 per 100

Fritillaria

(Snakeshead Fritillaria)

Bearing graceful drooping bell-shaped flowers in April and May, charming for grouping in half shady borders and for clumps in the rock garden. The Meleagris varieties (Snakeshead Fritillarias) produce a pretty effect naturalized in grass, in shady glens or under large trees. Plant the bulbs about 4 inches deep (the lighter the soil the deeper they should be planted), placing a little sharp sand around them. As pot plants (several in a pot) they are very pretty.

Fritillaria Imperialis

(Crown Imperial)

The Crown Imperial is a most stately, hardy border plant with a circle of large pendulous flowers at the top of the stem surmounted by a green crown of leaves. Plant deeply in the Autumn about 6 to 8 inches and 12 inches apart. A good rich soil is required and care should be taken in heavy soils to avoid moisture settling in the centre of the bulbs which causes decay, this can be overcome by planting the bulb on its side. They can be left undisturbed and will continue to thrive for many years.

Early Flowering Gladioli

These early flowering Gladioli belong to various races and are similar in form to the large flowering type although the flowers are more dainty. They are carried on wiry stems about 18 inches high and make ideal cut-flowers; if cut when the bottom florets begin to open the rest will gradually open in water and so give a prolonged period of beauty. The corms should be planted in the Autumn in a rich soil about 3 inches deep and 6 inches apart; a plentiful supply of bone-meal in the soil is a splendid aid to obtaining prize blooms.

BYZANTINUS, a very beautiful and distinct plant, much admired in the border, flowers are of a bright rosy-purple, also valuable for naturalizing.

HYACINTHUS, other varieties see Muscari page 93.

Irises (Bulbous Rooted)

It would be difficult to name any other hardy bulbs that repay the trouble of cultivation better than the Iris. Their blossoms compete in richness and variety of colours with the choicest and most beautiful of Orchids. They are most easy to cultivate and succeed splendidly in almost any soil. As cut-flowers they are particularly useful as the blooms last well if cut when the buds are opening.

DUTCH IRIS COLLECTIONS OF DUTCH IRIS

These Iris are similar to the Spanish type but are somewhat stronger in growth and bear larger blooms from May onward. Plant in September and October 3 inches deep and about 4 inches apart in a gritty soil. The Wedgwood and Emperor are particularly good for forcing and are much used by Florists.

The fragrant Spanish Iris, natives of Spain and Portugal, are similar in character to the Dutch Iris but make a smaller growth and flower about two weeks later, they can therefore be grown in succession to the Dutch variety and are most valuable as cut-flowers, the spikes can be cut when in bud and will open well in water and last a considerable time. They thrive in a gritty soil that is not heavy or damp. Plant 3 inches deep and about 6 inches apart in October and November.

- VARTANI ALBA**, a rare and lovely winter-flowering species from Nazareth, Palestine with slate or white flowers veined with soft blue and violet, yellow crest. A little treasure for Alpine house or sheltered spot in the rockery, height 6 inches or less. \$ 1.30 per doz.; \$ 9.75 per 100

Ixia (African Corn Lily)

These African Corn Lilies, as their name implies, are natives of South Africa, they are very free flowering producing long graceful racemes of delightful coloured blooms on strong wiry stems about 16 to 18 inches high and make an ideal flower for cutting. Plant 3 inches deep and about 3 inches apart in a sandy loam and sunny position where they can be left undisturbed. Give a covering during winter. They can also be grown as pot plants and given the same treatment as Freesias but the pots should be plunged to their rims in peat or ashes in a sheltered position until February when they may be brought into a cold-frame.

Ixiolirion

A graceful bulbous plant frequently known as the Ixia Lily producing a number of semi funnel-shaped flowers in May and June on wiry stems some 16 inches high amid greenish-grey long narrow leaves. They are elegant cut-flowers and deserve a more extensive cultivation. The bulbs should be planted 3 inches deep about 6 inches apart in a sheltered position in a well-drained soil and can be left undisturbed although it is advisable to give them a protective covering in the winter.

LEDEBOURI, an early flowering edition of the well-known Pallasi with a lighter shade of porcelain-blue. It requires a fairly open sunny position, 15 inches, May flowering. **70 cts per doz.; \$ 5.00 per 100**

PALLASI (TATARICUM), dark violet-blue, flowering at the end of May, very elegant and showy, long lasting, height 18 inches. **55 cts per doz.; \$ 4.00 per 100**

Lachenalia (Cape Cowslips)

Lachenalia are generally regarded as house plants although they can be grown outdoors in a mild district. Grown indoors they are most elegant flowers for the greenhouse and flower profusely. The bulbs should be potted in the early Autumn, 6 bulbs to a 5 inch pot with a compost of two parts loam, and equal parts of leaf mould and sand. Place the pots in a cool frame until the end of October, giving water sparingly, as soon as growth appears more water can then be given but on no account over water, when the buds appear give a weak liquid manure about once a week until the flowers open. The drooping tubular flowers carried on erect stems appear from February till May.

NELSONI, rich golden-yellow bells faintly marked green and a reddish stem, very fine and of free flowering habit. **40 cts each; \$ 4.00 per doz.**

PENDULA, 12 inches, bright coral red, edged sea-green and purple. Large flowers on long spikes. Blooms end of December and lasts a long time as pot plant. **40 cts each; \$ 4.00 per doz.**

Leucocoryne

IXIODES ODORATA (Glory of the Sun), producing on slender stems umbels of 3 to 4 charming flowers of a delicate sky-blue, heliotrope-scented, height 18 inches. It requires a similar treatment to Freesias and blooms from February to March under glass. **50 cts each; \$ 5.00 per doz.**

Leucojum (Snowflake)

Leucojum or Snowflake as they are frequently called are easy to cultivate and thrive almost in any well-drained soil. They resemble the Snowdrop in form although a much larger flower. *L. aestivum* is often referred to as the Summer Snowflake and forms elegant plants in April and May with flower spikes about 16 inches high. Plant in Autumn 4 inches deep and 4 inches apart, preferably in a shady part rather than in the full sun. Once planted they can be left, in fact the least disturbed the better they thrive.

AESTIVUM (SUMMER SNOWFLAKE), white with twin flowers of drooping habit on long stems, likes a cool place; flowering in April–May, height 1½ feet. \$ 1.40 per doz.; \$ 10.50 per 100

Lilies for Early Shipment

The *Lilium Candidum* is the snow-white Madonna lily with a delicious fragrance. Bulbs should be planted on arrival in September with only 1 inch of covering soil in a sunny part and left undisturbed. *L. excelsum* bears handsome apricot flowers with distinct scarlet anthers and reflexed petals. Plant 4 inches deep in a loamy soil and partial shade and the flower will appear in June.

LILIUM CANDIDUM (THE WHITE MADONNA LILY), purest satiny-white silver chalice like flowers of delicious fragrance, limited stock, height 3–5 feet. Fine mammoth bulbs. Plant shallow. 60 cts each; \$ 6.00 per doz.

LILIUM EXCELSUM (TESTACEUM), handsome apricot coloured flowers with distinct scarlet anthers and reflexed petals, plant 4 inches deep in good loamy soil and half shade, lime loving, June flowering, height 5–6 feet. \$ 2.00 each

Muscari

(Grape, Starch and Feathered Hyacinths)

The Muscari is often referred to as the Musk Hyacinth because of its scent and is easy to grow in all its forms, being of a dwarf nature it is a most excellent plant for the rockery although clumps in the border give a bright appearance. The bulbs should be planted in September and October about 3 inches deep and 4 inches apart, once planted they can be left to grow and multiply. Some varieties are also suitable for forcing in pots in a cool greenhouse and make a very desirable indoor plants.

Oxalis

There are a number of species of this genus but the two we offer are the most popular and easy to cultivate. *O. Adenophylla* with its dwarf lilac-pink flowers and crinkled foliage is most attractive. *O. Deppei* with its dainty coppery-red blossoms and clover-like leaves never fails to draw attention. Plant in a sunny position about 2 inches deep. They are also very easy to grow as pot plants in a greenhouse. Plant the bulbs in a pot with a compost of sandy loam and leaf mould covering the bulbs with only about ½ inch of soil with 8 to 9 bulbs to a 5 inch pot. After potting place in a cool place until growth appears and then move to the light. No water should be given until growth appears and then only sparingly with an occasional application of liquid manure.

ADENOPHYLLA. A lovely species from Chile forming small compact rosettes of foliage and dainty small, lilac-pink flowers. Height 3 inches. Strongly recommended for the rock-garden in a very sunny position, flowering May to July. Not hardy in the north (see illustration page 96).

Double Peonies

Culture: Peonies will thrive in a sunny or partly shaded place in well-cultivated deep, rich soil, they should be set so that the eyes are definitely not more than two inches under surface of soil. Do not plant Peonies where Peonies have been planted before, unless all the old earth has been removed and fresh earth substituted. Never use fresh manure, use bone-meal or decayed manure in early spring as a top dressing. The Peony detests having its ground invaded by tree roots, they like moisture, specially in hot and dry summers. Peonies take some time to become established, but once established they provide a glorious display of blooms.

Giant Ranunculus

RANUNCULUS GRANDIFLORA CHOICE MIXED COLOURS. One cannot really appreciate the bold and brilliant beauty of this new strain of Peony-Flowered Ranunculus until, having planted a few patches in the garden, the wonderful colours of this long stemmed and very free flowering new race are seen, containing as it does almost all colours of the rainbow. They require a sunny, well-drained position in the garden and they can be planted from December until April. Plant 2 inches deep, giving protection in the winter. Flowering in May-July, height 10 to 14 inches. **75 cts per doz.; \$ 5.50 per 100**

Richardia (Calla)

Richardia are frequently known as the Arum Lily and the Zantedeschia. They are valuable greenhouse plants and much used for Church decoration. The flower is an erect club-like spadix enclosed by a large funnel shape spathe. The bulb should be planted one in a 6 inch pot in a good fibrous soil mixed with sand and bone meal. The pots should remain in a temperature of about 60 degrees and when blooms appear they can be moved into the room etc. As cut-flowers they will remain in a good condition for a long period when placed in a deep vase.

AETHIOPICA (Africana), the well-known white Arum Lily, easy house plant to grow. Plant one in a pot in late autumn with top of tubers barely covered with rich soil plenty of water should be given during growing period, extra large tubers. **50 cts each; \$ 1.25 per 3**

ELLIOTTIANA, the golden Arum Lily is offered in our spring catalogue.

siberica Spring Beauty

Scilla (Squill)

(Early flowering)

Scilla are charming plants for early Spring flowering and are most attractive when planted in drifts and masses; being dwarf and compact they are also most effective in borders as well as in bowls for indoor plants. The *S. Tubergeniana* is a most striking variety, flowering in March and April. As the bulbs vary in size a safe guide is to plant the bulbs about 3 times their depth during October and November.

AMETHYSTINA (5), a most attractive novelty for the rockery producing beautiful pyramids of deep azure-blue flowers very outstanding in this section and of long lasting quality. **95 cts per doz.; \$ 7.00 per 100**

- SIBERICA ALBA**, the pure white form of siberica. 80 cts per doz.; \$ 6.00 per 100
- SIBERICA SPRING BEAUTY** (6), twice the size of S. siberica, lovely delphinium-blue, of upright habit. They are sterile and thus last a long time in bloom, while the rich flowering spikes are produced in succession. \$ 1.10 per doz.; \$ 8.00 per 100
- TUBERGENIANA** (6), soft blue on a silvery white ground a very outstanding and early flowering novelty, a beauty for the rockery and very successful for pot-culture. Small clumps and tiny patches of this variety are much admired for their brightness of colour, when there is hardly anything else in flower in February or March. \$ 1.50 per doz.; \$ 11.00 per 100

Scilla Campanulata (May-flowering)

The Spanish Bluebell (campanulata) and English Bluebell are extremely hardy and thrive in any soil and in shady parts which are unsuitable for most plants. Plant about 3-4 inches deep in October and November and they will flower in May and June. They are excellent pot plants but should be forced gently.

- ALBA MAXIMA**, producing strong spikes of open bell-like flowers of the purest white. 80 cts per doz.; \$ 6.00 per 100
- BLUE QUEEN**, producing erect spikes of a charming porcelain-blue shade, vigorous grower and very free flowering, recommended. 80 cts per doz.; \$ 6.00 per 100

Tecophilea (Chilian Blue Crocus)

This species from Chili with its Crocus-like flowers of gentian-blue have a fragrance similar to the Sweet Violet and is certainly one of the loveliest of the Spring flowers. It can be grown outdoor but requires some protection. The safest culture is in the greenhouse; the corms should be set one inch deep and one inch apart in a compost of equal parts of loam, leaf mould and sand, plunge the pots to their rims in a bed of ashes in a cold frame until growth appears and then place in the greenhouse. No water should be given until growth appears and then in moderate quantity only.

CYANOCROCUS, a rare but glorious deep gentian-blue species with conspicuous small white centre, narrow bright green glossy leaves, two inches in length and from them upon come three inch stems flowers resembling a crocus, but with a brilliancy of colour that rivals the intensity of the mountain Gentians. It is completely hardy, but is so rare that it is probably best grown in the safety and shelter of a pan in the Alpine house.

\$ 3.00 each

LEICHTLINII, beautiful soft sky-blue with conspicuous white eye in centre, very effective.

\$ 1.25 each

VIOLACEA, another fine violet coloured specimen of this rare family, only a few bulbs available, very charming.

\$ 1.00 each

Triteleia

An attractive and desirable little bulbous plant, which has been known under a variety of names, such as Triteleia, Triteleia conspicua, Milla and is now also known als Ipheion. It is a very beautiful little plant when grown in drifts between shrubs or in a pocket in the rock-garden. Bulbs are inexpensive and deserve a much wider popularity and a place in every garden. Plant 3 inches deep, May-flowering. May be forced under gentle conditions.

UNIFLORA, colour white, uniformly shaded blue, height $\frac{1}{2}$ feet.

70 cts per 25; \$ 2.50 per 100

VIOLACEA, a pleasing colour of soft violet-blue.

90 cts per 25; \$ 3.00 per 100

Tritonia

A pretty genus flowering in June and July with leaves about 6 inches long and slender flower stems growing to about 12 to 15 inches with orange shaded flowers shaped like broad short funnels. It is not suitable as an outdoor plant except in very mild districts, so should be grown in a cool frame or greenhouse with the same culture as for *Ixia*.

CROCATA ORANGE DELIGHT, a very pleasing shade of orange, a strong, long lasting branching flower of great beauty.

95 cts per doz.; \$ 7.00 per 100

Veltheimia

CAPENSIS, a native of South Africa and is most attractive with its broad wavy edged leaves about 7 inches wide and with flowers spikes about 24 inches high, not unlike a pale pink Red-hot Poker. They are essential indoor plants and bulbs—one bulb to a pot—should be planted in October and November in a compost of loam, leaf mould and sand. Start growth in a low temperature and as soon as growth appears they can be given heat gently; little further attention is required, an occasional watering and the flowers will appear from the latter part of the year until the Spring. \$ 3.00 each

Tall Bearded Flag Irises

(available July through October)

There has always been a great interest for this kind of Irises, easy in culture as they are; they can stay undisturbed for years in the same spot, multiply themselves and make colourful patches in the border. A good drainage and sunny position is desirable and a moderate dressing of lime or bonemeal is recommended before planting. They do not need a deep planting, cover the roots barely with soil.

Lilium hybrids

High quality American grown

The Lily stands pre-eminent for its beauty, grace and performance and is not particularly difficult to grow; it may be left undisturbed for years while it increases in richness and display.

Culture: Lilies must not be allowed to dry out, but should be planted immediately on arrival at a depth of three times the height of the bulb in a well drained light loamy soil. No Lilies will thrive in full shade. The first season after planting Lilies may not flower profusely, but once established, they increase in richness and display. Cutting the dead stems in autumn is essential for good results the following year.

Add a fresh top-dressing of old well decayed manure and rotted leaf-mould in early spring.

AURATUM VAR. PLATYPHYLLUM. A species from Japan and often called the Gold Band Lily. These lovely lilies, with their great, fragrant, waxy-white flowers, attractively spotted and with a prominent golden ray down the centre of each petal flowers in August and September. Height 4 to 6 ft. \$ 2.00 each; \$ 5.50 per 3

AURELIAN HYBRIDS. Each Plant is different from the other, but each one has that warm apricot colouring and is tall with good pyramidal inflorescence. In warm climates it is recommended that they be planted in part shade. These large lilies are an asset to any garden. Height 5 to 6 ft. Flowers late July. \$ 2.50 each; \$ 7.00 per 3

BELLINGHAM HYBRIDS. The flowers are ideally spaced on tall slender straight stems. The pyramidal flower-heads bear up to 20 flowers, while the colour range is complete from clear yellow through the yellow-oranges to the bright orange-reds with scarlet tipped petals. Flowers in June-July. Height 3 to 5 ft. \$ 1.25 each; \$ 3.50 per 3

BLACK MAGIC STRAIN. Producing giant plants with flowers of a good colouring of white with very dark reverse. The placement of flowers is excellent and for its colouring and vigour there is no finer strain. Flowers late July-August. Height 6 to 8 ft. \$ 1.25 each; \$ 3.50 per 3

BRONZINO STRAIN. This strain is a new selection from Fiesta Hybrids seedlings and consists of amber, sable and chocolate coloured flowers, some of them in bi-colour shades of sand and sable, mahogany and teak or amber and gold-topaz. Flowers in July. Height 3 to 5 ft. \$ 1.50 each; \$ 4.00 per 3

BURGUNDY STRAIN. Also a new selection from the Fiesta Hybrids and it consists of glowing cherry-red, deepest claret and subdued burgundy or port-wine coloured flowers. The iridescent petals are perfect in texture and have a most beautiful sheen. These lilies stand up well to the hot sun, never fading and so long-lasting in flowers that one has time to appreciate their outstanding colours. Flowers in July. Height 2 to 4 ft. \$ 1.50 each; \$ 4.00 per 3

CINNABAR. Our finest vivid maroon-red, upright flowering Mid-Century Hybrid. The flowers are borne on long pedicels, are well spaced and their maroon red colour glows in the sun and shows remarkable depth. Excellent for forcing, growing in pots in the cool greenhouse, planting in light shade or full sun. Flowers in June. Height 2½ ft. \$ 1.25 each; \$ 3.50 per 3

CROESUS. This is a tall, upright-flowering lily with large goblet-shaped, golden yellow flowers, nicely marked with near black spots. Flower has great substance and lasts unusually long, both when cut and on the plant. The base of the flower is a deep golden colour. Flowers in June. Height 3 to 4 ft. 85 cts each; \$ 2.25 per 3

DESTINY. A tall, cool, purest lemon-yellow that is most attractive. There are just enough brown spots on the petals to afford a beautiful contrast. As many as five large flowers can be open at one time and they are carried well above the lustrous dark-green foliage. Flowers in June. Height 3 to 4 ft. \$ 1.00 each; \$ 2.75 per 3

ENCHANTMENT. An upright Lily of excellent habit, with many well formed flowers of a vibrant, nasturtium-red colour. Full of life and depth, the colour blazes in the sun. The outstanding Mid-Century Hybrid. (U.S.S. Plant Patent No 862) F.C.C. R.H.S., Mass. H.S., and North America Lily Society. Flowers in June. Height 2 to 3 ft. 75 cts each; \$ 2.00 per 3

GOLDEN CHALICE HYBRIDS. The range of colours varies from clear lemon-yellow through the rich warm shades of gold and apricot-orange. Extremely drought-resistant, these hybrids are ideally suited for that warm, dry corner of the border where they will flower freely with a minimum of care. Flowers in May. Height 1½ to 3 ft. 85 cts each; \$ 2.25 per 3

GOLDEN SUNBURST. These lilies are tall and produce on long pedicels large, widely expanded, starshaped flowers. The fine-textured petals with green veined reverse form a typical Sunburst-type flower. Many of the golden yellow flowers open wide to show reddish-brown papillae in the centre. Flowers in late July-August. Height 5 to 6 ft. \$ 1.50 each; \$ 4.00 per 3

GOLDEN WEDDING STRAIN. A magnificent, tall, golden-yellow Lily with large reflexed flowers, well spaced on a tall and graceful stem. Highly recommended. Flowers in July. Height 3 to 4½ ft. \$ 1.50 each; \$ 4.00 per 3

GREEN MAGIC STRAIN. The variation in this majestic lily is within narrow limits. Most of the plants show a tinge of green in the white petals and the trumpets stay rather compact with the tips of the petals turning back. Thus, the aspect is of a whitish flower with a hint of green. Dark brown stamens. Highly recommended. Flowers in July. Height 3 to 6 ft. \$ 1.25 each; \$ 3.50 per 3

HARLEQUIN HYBRIDS. An entirely new strain. These lilies come in colours that vary from ivory-white, through pale lilac and old rose, to violet and purple, with intermediate shades of salmon, terracotta and amber-pink. Excellent as garden plants and for floral arrangements. Mature plants will carry from twelve to fifteen flowers, all well-curved and borne on short pedicels on tall stems. Flowers in June-July. Height 2½ to 5 ft. \$ 1.00 each; \$ 2.50 per 3

IMPERIAL CRIMSON STRAIN. A spectacular and vigorous group of seedlings of a deep crimson-red colouring. The flat flowers are of good colour, substance and texture. The tip of the petals gently curl back, making the anthers and stamens even more prominent. The colour is at its highest intensity in the centre of the petal. The papillae are concentrated in the centre of this deep colour which, diffusing from the midrib of the petal, becomes more silvery-pink as it nears the margin of the petal. Flowers in August. Height 5 to 7 ft. \$ 5.00 each

IMPERIAL GOLD STRAIN. The flowers are of the purest white, but heavily dotted with maroon spots and have that rich, golden stripe down the centre that sets them off so very distinctly from any other hybrid. The flowers are of great substance and size, each has a texture and a reflective quality that is unique among the lilies. Flowers in August. Height 4 to 6 ft. **\$ 10.00 each**

IMPERIAL SILVER STRAIN. As with the other Imperial Strains, the flowers are very large. The colour is a pure, translucent white, heavily dotted vermilion papillae. The pure white flower is still further endowed because of its rich orange-red pollen colour. Flowers in August. Height 5 to 6 ft. **\$ 10.00 each**

MARTAGON VAR. ALBUM. The pure white form of the long cultivated Martagon Lily, which is so popular in Europe and England. The dainty wax-like flowers are gracefully placed and form a symmetrical pyramid. One of the most permanent lilies, once it is happily settled, it will increase from year to year, forming larger and finer spikes. Flowers in June and July. Height 3 to 5 ft. **\$ 2.50 each; \$ 7.00 per 3**

MID-CENTURY HYBRIDS. A mixture of all colours and types, made up from excellent seedlings far too good to be discarded. Flowers in June. Height 2 to 4 ft. **75 cts each; \$ 2.00 per 3**

MONODELPHUM. A lovely, very early flowering lily with clear lemon-yellow flowers, with maroon base. The leaves are arranged in spirals and curled. Some flowers are more spotted than others; some deeper yellow, but all have a pleasant scent. Sometimes the tips of the petals are touched with crimson and may have a darker vein in the yellow centre of the petals. Flowers in June. Height 2½ to 3½ ft. **\$ 3.50 each; \$ 10.00 per 3**

MOONLIGHT STRAIN. This strain consists entirely of chartreuse-yellow coloured lilies. There is no hint of brown on the reverse of the petals but may have a light green-white central vein and soft, green-yellow colouring. Strong growing, hardy and robust; these lilies blend well with other summer flowering plants to make a rare picture in the garden. Flowers in July. Height 3 to 6 ft. **\$ 2.50 each; \$ 7.00 per 3**

OLYMPIC HYBRIDS. A modern strain of trumpet lilies, characterized by its extreme vigour and size, form, colouring and good placement of flowers. There is a pleasing variation among the individual plants and all types are represented. They range in colour from creamy trumpets, soft pink and the popular cool, icy-green. The exteriors of the petals are delicately shaded with light greenish-brown or soft wine tints and in some instances are of a pure, glistening white. Flowers in July-August. Height 2½ to 6 ft. **75 cts each; \$ 2.00 per 3**

PAISLEY STRAIN. A strain of hybrids of transcending beauty. They display all the lovely colours of the well known Paisley shawls and show the same warmth and beauty. The flowers are recurved and the colours range from yellow and orange, lilac and purple to tangerine and mahogany, all with tiny maroon dots. Flowers in June. Height 3½ to 5 ft. **\$ 1.50 each; \$ 4.00 per 3**

PINK GLORY STRAIN. This vigorous strain with really wide leaves, has its flowers carried well away from the central stem on thin but wide pedicels. The fresh, pleasing almost salmon-pink of the petals stems from the centre of the flower, diffusing outwards to cover the petal, but leaving a narrow margin of white. Concentrations of the darker pink shade are found in the papillae, giving a spotted pink effect in the throat of this bowl shaped flower. The very base of each petal is green and forms a star at the very heart of the flower. Flowers July-August. Height 4 to 6 ft. **\$ 10.00 each**

PINK PERFECTION STRAIN. The flowers are suffused a deep pink. This colour extends over the inner as well as the outer surface of the petals and is very beautiful. These lilies are true and definite fuchsia-pink in a cool and moist climate. The flowers are borne all around the stem and are well spaced. The buds are pale green when young, then purplish in colour, which fades a little to pink as its gets older. Most certainly a fascinating lily. Flowers in July. Height 3 to 7 ft. **\$ 2.00 each; \$ 5.50 per 3**

PROSPERITY. An entirely new colour in the Mid-Century Hybrid Lilies is being introduced with this lovely, cool, lemon-yellow, outward-facing flower. Extremely vigorous, and hardy, this lily will be a sensational garden plant for the years to come. Flowers in June. Height 2 to 3 ft. **\$ 1.00 each; \$ 2.75 per 3**

ROYAL GOLD. A golden yellow Regale Lily. This beautiful new strain is of better form than the Lilium Regale. The true golden coloured flowers have a most attractive, shiny, glistening surface, which adds to its beauty. Unusual plants with charm and appeal in the early summer garden that nothing else can equal. Flowers in July. Height 3 to 5 ft. **\$ 1.50 each; \$ 4.00 per 3**

SENTINAL STRAIN. This strain is bound to be as popular and famous as the Olympic Hybrids. The flowers of impeccable form open very wide, almost bowl shaped and are of the purest white, with a soft golden throat and strongly contrasting dark brown pollen. Exceptionally hardy, it is the earliest white trumpet we recommend without hesitation. Flowers in June-July. Height 3 to 5 ft. **\$ 1.50 each; \$ 4.00 per 3**

SPECIOSUM RED CHAMPION STRAIN. A strain of the *L. speciosum*, the red showy lily. A grand lily for garden decoration, cut flower or pot culture in a cool greenhouse. This pink and white Lily likes a light shade during the hottest part of the day. Flowers in August-September. Height 2½ to 3½ ft. **\$ 1.00 each; \$ 2.50 per 3**
